**Clever Mom Takes Control of Baby's Bath Time  
Tubby Bundle Assists Apprehensive Parents**

Westborough, MA - Kristen Arnold has been creating her exclusive handcrafted Tubby Bundles for over five years. She wanted to stay dry and keep both hands on her baby during bath time. Unable to locate anything in the stores to match her objectives, she decided to design and sew her own ingenious product. "I loved using what I called my "Tubby Bundle" to bathe my son," announced Arnold. "I decided to make a few for family and friends," she added. Inspired by the rave reviews her innovative bath helper received, Arnold decided to start an online business.

Arnold coupled her love of sewing with a desire to help new parents safely bathe their babies. Tubby Bundle allows mom or dad to keep their hands on the baby at all times. The plush oversized towel fits comfortably around the neck and ties securely in back. When bath time is over, simply lift baby from tub to your chest and bring the bottom of towel up to cover baby. The towel's length protects legs from splashes and cushions knees when kneeling tubside.

Today's savvy parents seek innovative products and expect quality, comfort, and easy-care. Arnold's handcrafted invention is durable and easily laundered. Tubby Bundles are available in several styles. Arnold uses traditional "baby" colors for the Classic Tubby Bundles and patterns and color hues from yesteryear in the Vintage Tubby Bundle selections. In addition, Arnold offers a custom made-to-order Tubby Bundle in the Personalized Collection. "My handmade bath time helper, a thoughtful shower gift or purchased for yourself, is a welcomed treat," declared Arnold. According to Arnold, new dads, worried about slippery babies, appreciate this useful product too. "The Tubby Bundle encourages a positive, loving, and safe bath time experience," Arnold says. "Let 'em splash, Tubby Bundle has you covered," she concluded.
